BLS - 3 LAB

Digital Area Alarm Unit

Bed Head Units

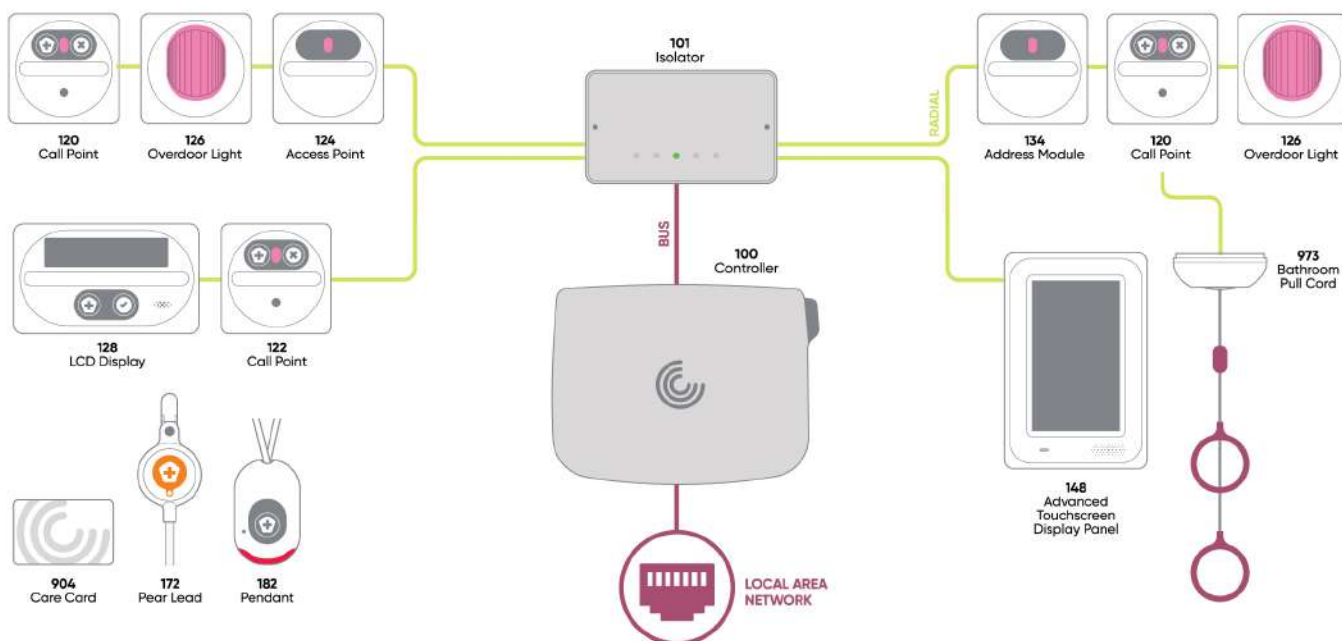

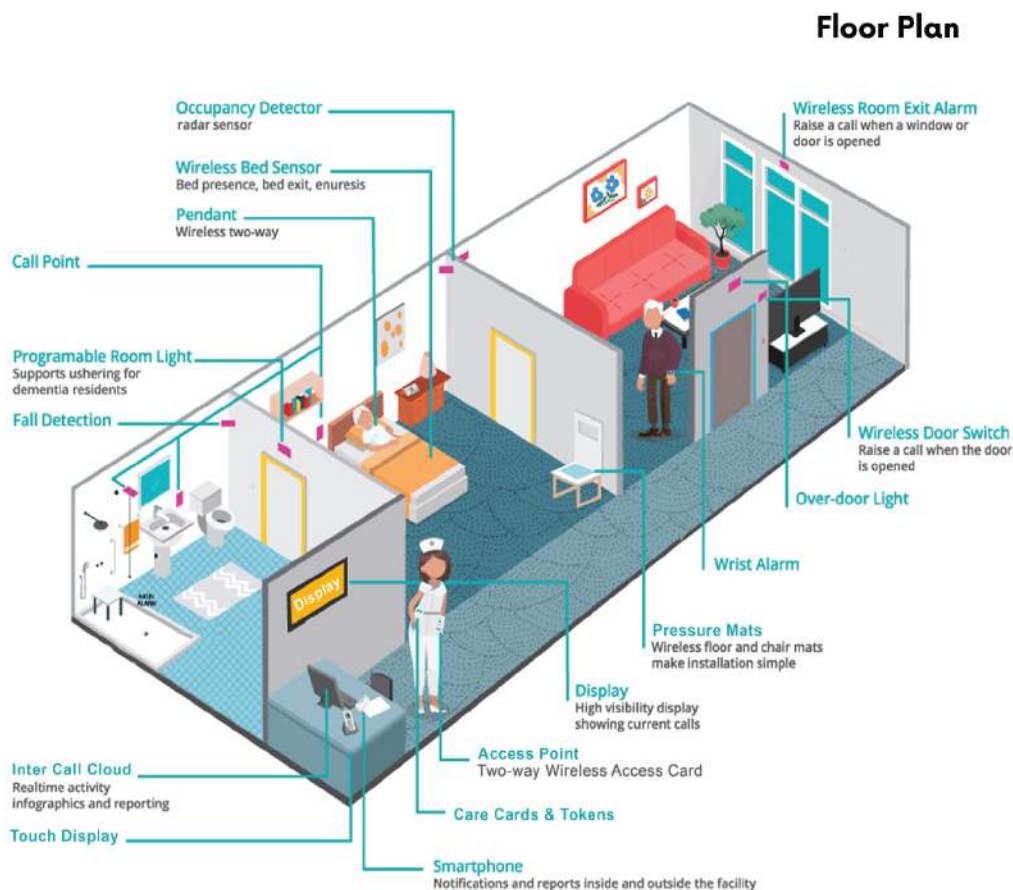

# OUR TURNKEY SERVICES

For 10+ years, New National Medicals has supplied hospitals, clinics, labs and many other medical sectors the best medical equipment globally.

## Nurse Call System

### KEY BENEFITS

- Simplicity**  
With system topology based on decades of experience and reliability, the 2 wire InterCall Bus network can often utilise existing cabling infrastructure for a system upgrade.
- Programming**  
Intuitive system programming interface via a web embedded server accessed using an internet browser.
- Secure Data**  
With Password protected access all nurse call system events are recorded with a date and time stamp.
- Audio-Visual**  
Bright display showing clear nurse call information for staff to prioritise the appropriate alert response.
- Staff Locations**  
Call accept and Show Staff button to report active nurse presence locations.
- Display Options**  
The Display panels are available in either a standard LCD version, or as an advanced colour touchscreen.

## Datalogging

### Record, Report, Reassure

Touch Controllers automatically capture and record all nurse call system activity. With the capacity to log over 100 million events, the Intercall embedded data log is an indispensable management tool for modern care providers, giving care managers and nursing staff valuable insight into the day-to-day running of their care facility, while demonstrating accountability to patients and their families, reassuring them of the highest level of care.

Explore our diverse portfolio of high-quality medical equipment, including innovative medical gas equipment, pendants, dental gear, and more.
